

Technical Information

CC800.3 Board Cleaner & Conditioner

● General Information

Ensuring a good writing surface is essential for enhancing the performance of any dry-erase ink. Many cleaners are made with aggressive solvents that can damage the board surface. Our two-in-one product not only cleans the board but leaves a conditioning film of release agents to make subsequent erasure easier.

We supply board cleaner as a non-hazardous concentrate. Simply add 95 parts of a suitable solvent, such as isopropanol to 5 parts of CC800.3 to make up the finished product. Solvents with high boiling residues such as white spirits should be avoided.

- Cleans and conditions
- Reduces shipping costs
- Non-hazardous concentrate
- Easy to dilute

● Approvals

| US | European |
|--|----------|
| ASTM D-4236 | |
| 16 CFR 1500.3 (max reservoir capacity is 20ml) | |
| TSCA | |
| Proposition 65 | |

● Storage Advice

CC800.3 is a stable substance with good oxidation stability and we guarantee a shelf life of 12 months from receipt, if stored tightly closed in the original containers under dry conditions and at room temperature (25°C).

If the material is kept beyond the guaranteed shelf life under the recommended storage conditions, a shelf life of at least 24 months may be achieved.
