

Pen or lethal weapon?

What do you really know about the ink in your pen or marker? Is it safe? Is it toxic? Is it legal? Does it contain xylene, benzene or toluene? Is the heavy metal content legal? Does it comply with ASTM D-4236, BS EN71 3/9 or TSCA?

To be sure you have the right answers, specify Multichem inks - made in the UK and independently certified to international standards.
